

Sustainability and the Environment

Figure 17 shows the respondents views of potential problems in Cleobury Mortimer. Respondents were able to select more than one answer.

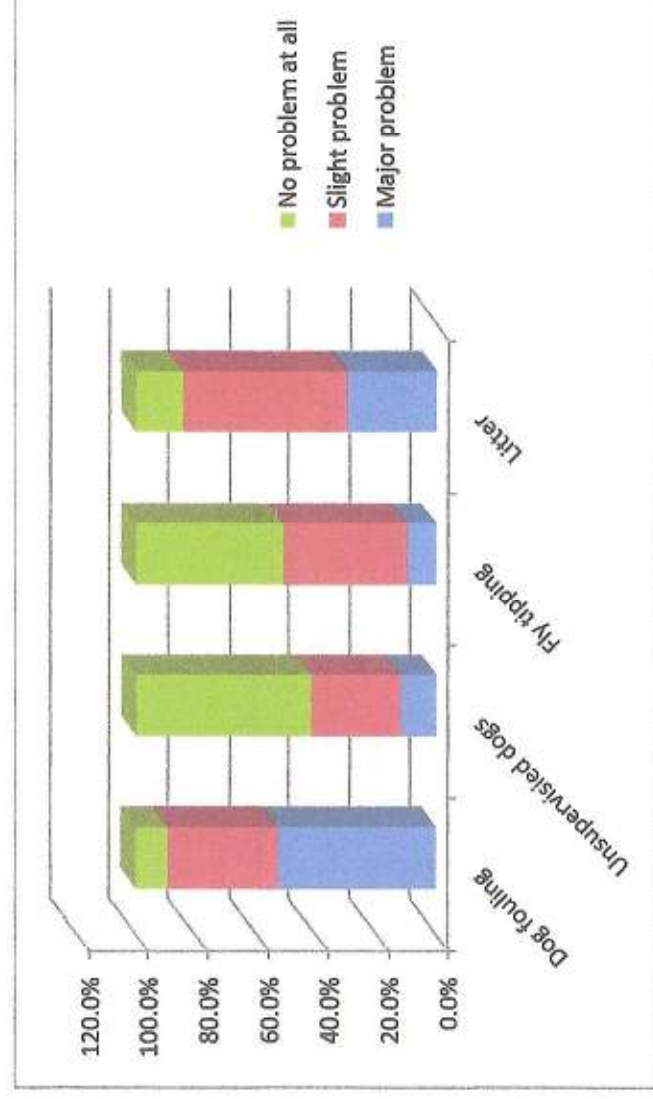

Figure 17: Respondents views on problems in the town

31 respondents also identified additional issues, which included:

- Parking issues
- Pollution (noise and air) from vehicles, solid fuel, water treatment works, air conditioning units
- Streets not clean/cared for
- Roaming cats
- Hedge maintenance
- Graves in cemetery

101 respondents chose to provide specific details of the problems featured in figure 17. The issue that generated the most comments (66) was dog fouling, with areas around the school, primary school and playing fields most frequently cited as having a problem. Littering generated 28 comments with no one area being specifically highlighted, but a number of comments about the general view of the community.

Other issues highlighted were:

- Poor maintenance of footpaths, play areas and the cemetery; not cleaned, weeded, hedges overgrown etc (7 comments)
- Parking issues (5 comments)
- Problems with unsupervised dogs (5 comments)
- Fly tipping (3 comments)
- Not enough street lighting (2 comments)
- Speeding vehicles (2 comments)

The questionnaire then asked about energy efficiency or low carbon measures installed in respondents' homes. The results are shown at figure 18. Respondents were able to select all the options that applied to them.
